

A CLOUD-BASED LMS DESIGNED FOR LEARNERS

Sonata Learning's consultants have developed course content for dozens of learning management systems, from popular open source and commercial packages to our clients' proprietary platforms. Recognizing a need for a reasonably priced LMS that combines the ease of cloud solutions with the flexibility and support of an enterprise application, we created the Sonata LMS.

MODERN, MOBILE, USER-FRIENDLY INTERFACE.

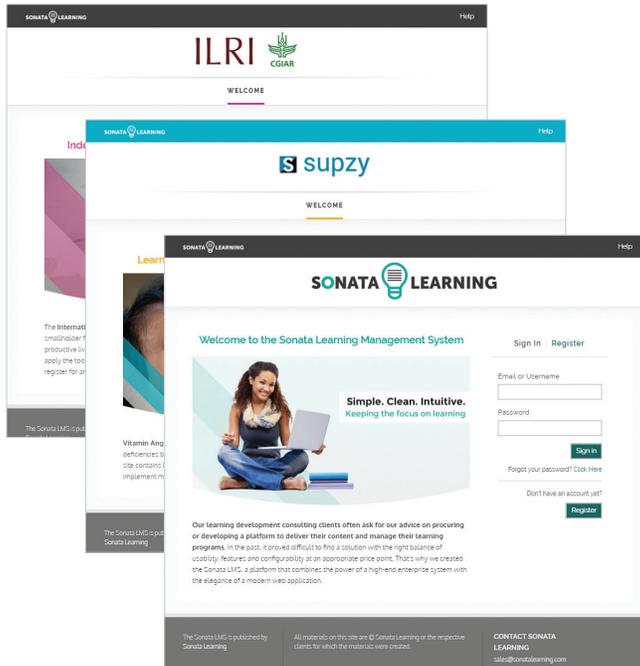

When designing the learner interface, we took inspiration from applications outside the LMS market. Our goal was to create a clean, modern look and feel that resembles other web applications that learners use every day.

- Simple navigation that helps learners to quickly find their assignments and on-demand content
- Create multiple portals for different audiences, so learners only see courses relevant to them
- Responsive, "mobile-first" design that translates elegantly across devices

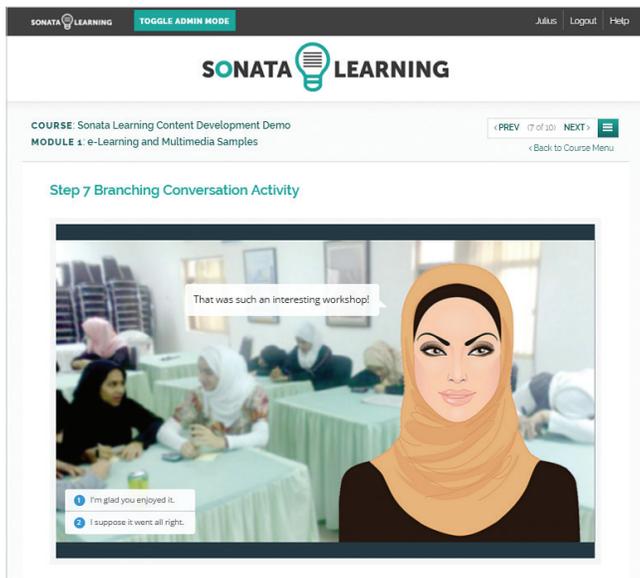

CLOUD CONVENIENCE. GROUND SUPPORT.

Sonata LMS combines the benefits of a hosted SAAS solution with the high level of professional service associated with traditional enterprise applications.

- Hassle-free set-up and hosting on secure cloud servers
- A wide variety of configuration options lets the platform adapt to your specific needs
- Ongoing training opportunities and support for your administrators

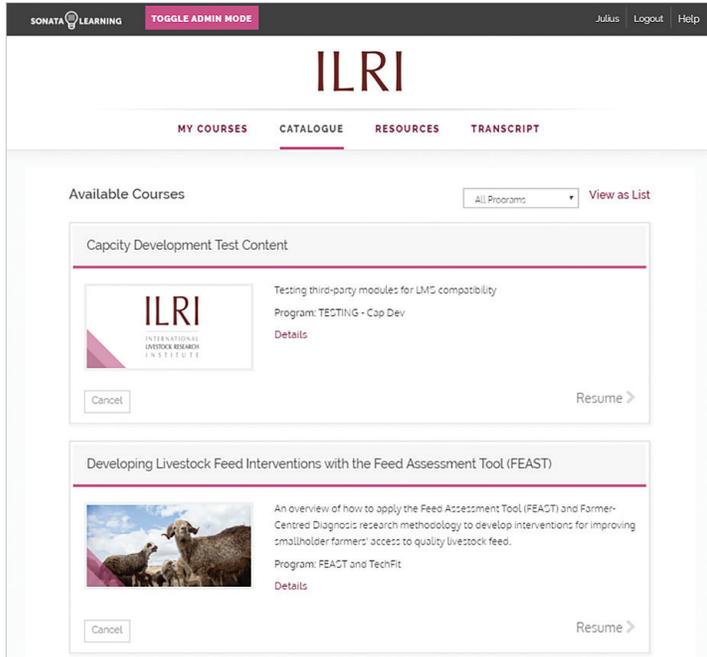

Create branded portals for different audiences

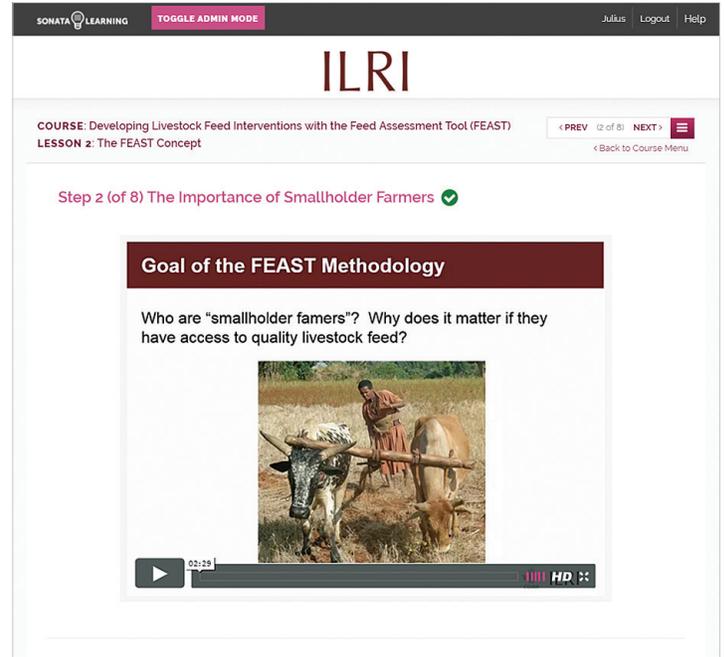

Clean, simple, learner-friendly interface

GO BEYOND "E-LEARNING"

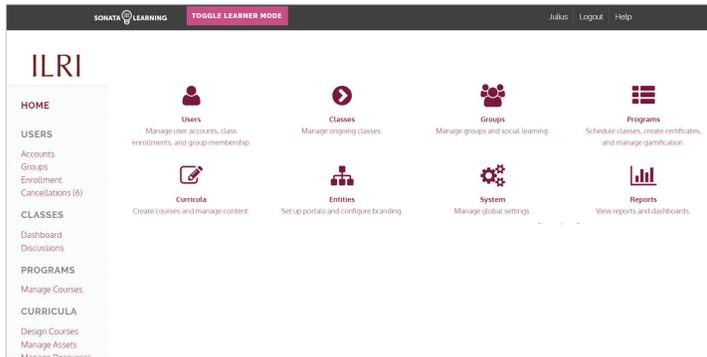

1. Combine multiple types of media in addition to SCORM content
2. Integrate social learning and instructor interactions into on-demand courses
3. Reach audiences in regions with limited / zero connectivity with our Offline Player

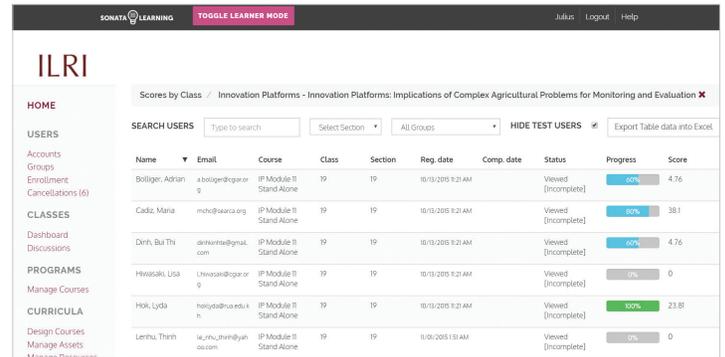

Clean, modern UI provides learners easy access to assignments and on-demand courses

Stream and track video from your preferred services including Vimeo, YouTube, Brightcove and more

Provide instructors, content authors, managers, registrars and other staff with admin and reporting features appropriate for their specific role

Use built-in reports and dashboards, or access data directly with your preferred tools (Tableau, Crystal Reports, Excel, etc.)

ABOUT SONATA LEARNING

Sonata Learning's mission is to make world-class learning and technology solutions accessible to a wide range of organizations. Our team provides learning-related consulting, content development services and technologies to businesses of all sizes as well as NGOs, nonprofits, universities, research institutions and government agencies. Our clients operate in over 30 countries across the globe.
